

CompTIA Security + (Seminar)

This online seminar in CompTIA Security + leads students through the official CompTIA Security + Certification exam guide culminating in the CompTIA Security+ certification exam. Students gain skills required to install and configure systems to secure applications, networks, and devices; perform threat analysis and respond with appropriate mitigation techniques; participate in risk mitigation activities; and operate with an awareness of applicable policies, and laws.

This seminar will be presented exclusively online as an on-demand course that students can complete at their own pace over a span of two months by accessing, reviewing, and completing a blend of video tutorials, labs and exercises. All the material needed to complete this seminar successfully is available online and made accessible to each enrolled student. Students will be provided a user ID and password to allow them access to view the material in the seminar. The user ID will also be used to track attendance, which is essential for successfully completing this seminar.
